

Installing PayMaster payment plugin for WordPress + WooCommerce

1. Log in to your website admin panel (“Plugins → Add New Plugin” section).
2. Click “Upload Plugin”, choose **paymaster.zip** and click “Install Now”. The **PayMaster** module will appear in Installed Plugins. Click “Activate”.

3. Go to “Payments” tab of WooCommerce Settings and find the plugin installed. Click “Manage”.

4. In the editing form that opens, fill in the plugin settings:
- Copy Token and Merchant ID values from the PayMaster Merchant's Personal Account;
 - Switch plugin status to "Enabled";
 - Click "Save changes" button.

The screenshot shows the WordPress admin interface with the 'PayMaster for WooCommerce' settings page. The left sidebar contains navigation links: Dashboard, Posts, Media, Pages, Comments, WooCommerce (active), Home (1), Orders, Customers, Coupons, Reports, Settings, Status, Extensions, Products, Payments, Analytics, Marketing, Appearance, Plugins, Users, Tools, and Settings. The main content area is titled 'Settings' and has tabs for General, Products, Tax, Shipping, Payments (active), Accounts & Privacy, Emails, Integration, Site visibility, and Advanced. The 'PayMaster for WooCommerce' section is expanded, showing the following settings:

- Enable/Disable:** ☒ Enabled
- Base service address:**
- Token:**
- Merchant ID:**
- Payment service name:**
- Payment service description:**
- Logging:** ☒ Enabled

A blue 'Save changes' button is located at the bottom left of the settings area. The top of the page shows the WordPress logo, site name 'WordPress - PayMaster Test', status 'Live', and user 'Howdy, admin'.
